SUMMARY

Enthusiastic Computer Science Engineering student specializing in frontend development with **HTML, CSS, and JavaScript**. Possessing full-stack awareness through experience with **Node.js** and **MongoDB**. Actively applying a keen interest in **Generative AI and Prompt Engineering** in a current internship. A proven problem-solver seeking to contribute and grow as a Frontend Developer.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering | CGPA: **8.95 / 10**
Jain College of Engineering and Research, Belagavi | *2022 – 2026*
Pre-University (Class XII), PCMB| Percentage: **86%**
Mahesh PU College, Dharwad |*2021 – 2022*
Secondary School (Class X) |*2020* | Percentage: **88%**
Adarsha Kids Scholars Foundation Convent School, M Belawadi

TECHNICAL SKILLS

- **Frontend & Languages:** HTML, CSS, JavaScript, Python
- **Backend & Databases:** Node.js, MongoDB ,React
- **Tools & Platforms:** Git , GitHub
- **EmergingTech:** LLMs, LangChain, AI Agents, prompting techinques

PROJECTS

Food Donation and Distribution Platform | *BIT College, Bengaluru* | Jan 2025 – Dec 2025

- Developing a web app connecting food donors with recipients to reduce waste.
- Implementing real-time tracking and user verification for platform reliability.
- **Achievement**: **Secured 1st Place** in a State-Level Project Competition (2025).
- Live Demo **: https://bangalore-final.onrender.com/index.html**

Online Property Management System | *Jain College of Engineering and Research* | Jan 2024 – Dec 2024

- Designed a web-based system for tenant-landlord communication and lease management.
- Implemented payment tracking and centralized online records with real-time updates

Fake Product Detection System using Blockchain | *Jain College of Engineering and Research* |Aug 2025-Dec 2025

- Engineered a DApp on Ethereum with Solidity smart contracts for tamper-proof product authentication.
- Integrated MetaMask for wallet connectivity and built a responsive UI with HTML/CSS/JS.
- Used Node.js and Truffle to facilitate frontend-blockchain communication.

TaskMaster Pro | Full-Stack Task Management Application

- Built a task management system with user authentication, CRUD, and real-time collaboration using Flask, MongoDB, and JavaScript.
- Implemented email notifications, file attachments, and data export (CSV/PDF).
- **Live Demo:** taskmaster-frontend-jvwk.onrender.com | GitHub: github.com/Tejaa99/taskmaster

INTERNSHIP

Web Development Intern | Acmegrade | Feb 2025 – Apr 2025

- Completed an intensive, project-based internship building responsive, real-world web applications.
- Strengthened core competencies in HTML, CSS, JavaScript and modern development workflows.

Gen AI Research Training | *Vayavaya Labs*

- Currently undergoing foundational training in Generative AI concepts and tools
- Preparing for hands-on development work in AI model fine-tuning and implementation
- Expected to contribute to real-world AI projects

Full Stack Intern |Spherenex | Present

- Working on full-stack development projects using HTML, CSS, JavaScript, and React.
- Actively enhancing JavaScript skills in a professional environment.

CERTICATIONS

Java with Data Structures & Algorithms | *Apna College* | *2025*

AI Tools Workshop | *be10x* | *2025*

ACHIEVEMENTS

1st Place -Bangalore State-Level Project Competition | 2025

- Secured top rank among statewide competitors for the Food Donation and Distribution Platform
- Recognized for innovative approach to solving social challenges through technology

Hackathon Participant | *Lakshmeshwar* | *2025*

- Competed in intensive coding competition, developing solutions under time constraints
- Collaborated with team to design and implement functional prototype
